

Amstar[®] Pumps

60Hz PRODUCT CATALOG
an ISO9001 compnay

CHOOSE QUALITY, CHOOSE AMSTAR

———— pumping solutions ————

established 2023

The Amstar advantage.

Global Supply.

Reliable product availability through our international supply network.

Engineering Expertise.

Designed and developed with strong engineering knowledge and industry experience.

Assured Quality.

Manufactured using high-quality materials and strict quality control standards.

Trusted Support.

Dedicated customer support to assist with product selection and technical guidance.

Low Maintenance.

Designed for durability and minimal maintenance requirements.

4", 6" 8" amstar submersible motors

The Amstar Submersible Motor is designed to deliver reliable, efficient, and long-lasting performance for borewell and submersible pump applications. Engineered for continuous operation, it provides stable output even under demanding working conditions.

Manufactured using high-quality SS304 and Stainless steel components, the motor offers excellent corrosion resistance, mechanical strength, and durability, ensuring an extended service life. The water-filled design provides effective internal cooling and lubrication, resulting in smooth operation, reduced wear, and improved efficiency.

The motor is equipped with high-grade copper windings and superior insulation to ensure electrical safety and protection against voltage fluctuations. Precision assembly and strict quality control processes ensure consistent performance and reliability in the field.

SS304 OR CI Motor Base

Stainless steel brushed motor base, ensuring the upmost quality of the motor and precision.

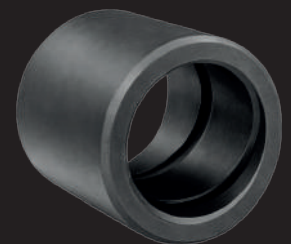

Stainless Steel 400 Motor Shaft

Stainless steel brushed motor base, ensuring the upmost quality of the motor and precision.

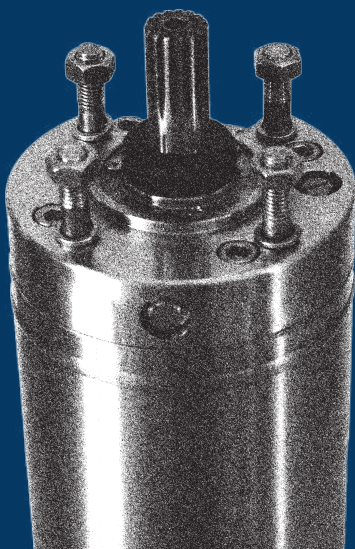

Mechanical or Oil Seals

Stainless steel brushed motor base, ensuring the upmost quality of the motor and precision.

Carbon Bushes

Stainless steel brushed motor base, ensuring the upmost quality of the motor and precision.

Submersible Motors

4", 6", 8"

Body Material
Stainless Steel 304

Coolant type
Water filled

Base Material
SS304 or CI

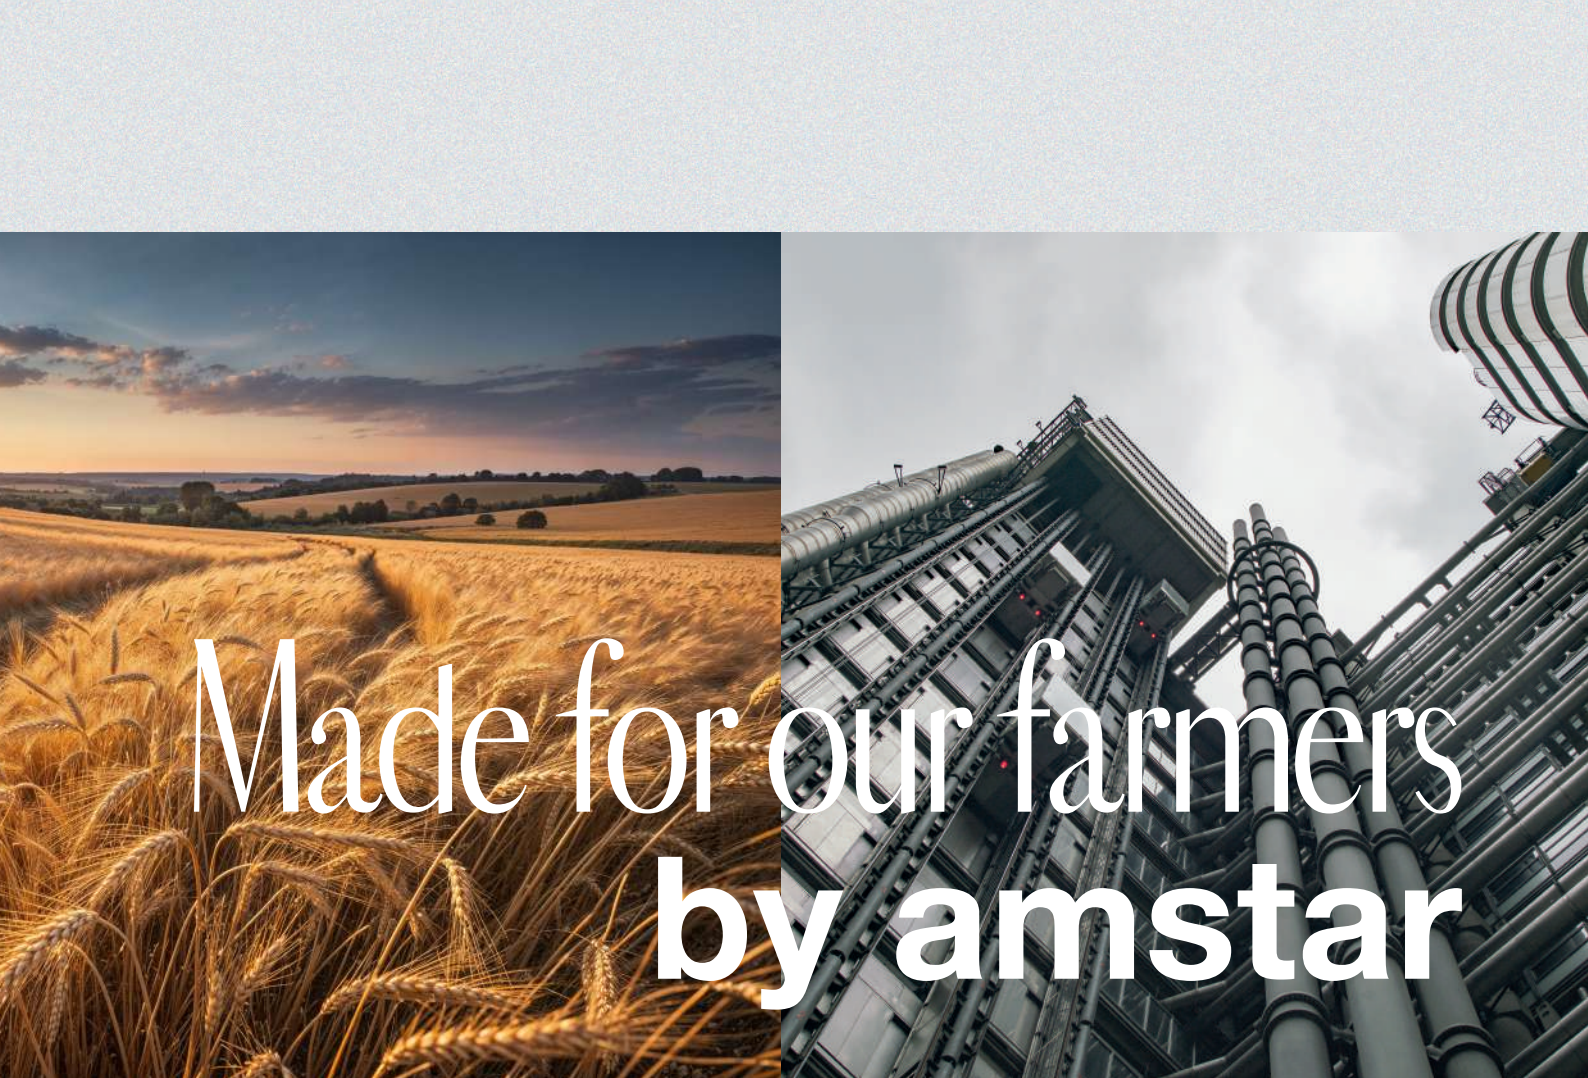

Specification

ⓂHz	60Hz
ⓂHP	4" 0.75 - 7.5
	6" 10 - 50
	8" 60 - 150
ⓂV	230V, 380V, 460V
Ⓜ∅	Single & Three phase

Made for our farmers by amstar

Features

- Rewindable motor design.
- Manufactured to NEMA standards.
- IP68 protection rating.
- Simple construction for easy maintenance.
- Higher copper content for improved efficiency.
- Heavy duty thrust bearings.
- Low vibration & noise.

made with high
precision equipments

Long service life,
low maintenance.

Engery efficient
products.
